Hello Everyone,

When Donna and I were up in Montana participating on the site tour of the oil spill along Highway 35, we agreed to put together a list of questions that we receive and work on getting responses back to the homeowners. In addition to the questions that were first listed in the communication strategy I have also added in those questions we've received to date from the homeowners. Julie, if I missed any from what was brought up at the HOA meeting, please let me know. There are some that I've tried to put some answers to but many are still needing responses of which I have no answers for so I'm looking to the legal and technical folks to help fill in the gaps. I would like to consider this a working document in that we'll continue to add to the list as we get additional questions. I do want to share this information with the homeowners so keep that in mind as you work up responses. I've already been asked as to the status of the response to some of the questions by Mr. Gates, one of the displaced homeowners so the sooner we can develop the responses, the sooner I can get the information out to the homeowners.

Thanks, Libby
